:≡ APPLICATION PERMISSIONS

PERMISSION	STATUS	INFO	DESCRIPTION
com.google.android.c2dm.permission.RECEIVE	normal	recieve push notifications	Allows an application to receive push notifications from cloud.
com.kaspersky.safekids.permission.C2D_MESSAGE	unknown	Unknown permission	Unknown permission from android reference
android.permission.RECEIVE_BOOT_COMPLETED	normal	automatically start at boot	Allows an application to start itself as soon as the system has finished booting. This can make it take longer to start the phone and allow the application to slow down the overall phone by always running.
android.permission.WAKE_LOCK	normal	prevent phone from sleeping	Allows an application to prevent the phone from going to sleep.
android.permission.INTERNET	normal	full Internet access	Allows an application to create network sockets.
android.permission.KILL_BACKGROUND_PROCESSES	normal	kill background processes	Allows an application to kill background processes of other applications, even if memory is not low.
android.permission.RESTART_PACKAGES	normal	kill background processes	Allows an application to kill background processes of other applications, even if memory is not low.
android.permission.CHANGE_NETWORK_STATE	normal	change network connectivity	Allows applications to change network connectivity state.
android.permission.ACCESS_NETWORK_STATE	normal	view network status	Allows an application to view the status of all networks.
android.permission.ACCESS_WIFI_STATE	normal	view Wi-Fi status	Allows an application to view the information about the status of Wi-Fi.
android.permission.CHANGE_WIFI_STATE	normal	change Wi-Fi status	Allows an application to connect to and disconnect from Wi-Fi access points and to make changes to configured Wi-Fi networks.
com.android.browser.permission.READ_HISTORY_BOOKMARKS	unknown	Unknown permission	Unknown permission from android reference
com.android.browser.permission.WRITE_HISTORY_BOOKMARKS	unknown	Unknown permission	Unknown permission from android reference

PERMISSION	STATUS	INFO	DESCRIPTION
com.android.vending.BILLING	normal	application has in-app purchases	Allows an application to make in-app purchases from Google Play.
android.permission.GET_TASKS	dangerous	retrieve running applications	Allows application to retrieve information about currently and recently running tasks. May allow malicious applications to discover private information about other applications.
android.permission.FOREGROUND_SERVICE	normal	enables regular apps to use Service.startForeground.	Allows a regular application to use Service.startForeground.
android.permission.REQUEST_DELETE_PACKAGES	normal	enables an app to request package deletions.	Allows an application to request deleting packages.
android.permission.QUERY_ALL_PACKAGES	normal	enables querying any normal app on the device.	Allows query of any normal app on the device, regardless of manifest declarations.
android.permission.ACCESS_FINE_LOCATION	dangerous	fine (GPS) location	Access fine location sources, such as the Global Positioning System on the phone, where available. Malicious applications can use this to determine where you are and may consume additional battery power.
android.permission.ACCESS_COARSE_LOCATION	dangerous	coarse (network-based) location	Access coarse location sources, such as the mobile network database, to determine an approximate phone location, where available. Malicious applications can use this to determine approximately where you are.
android.permission.ACCESS_BACKGROUND_LOCATION	dangerous	access location in background	Allows an app to access location in the background.
android.permission.REQUEST_IGNORE_BATTERY_OPTIMIZATIONS	normal	permission for using Settings.ACTION_REQUEST_IGNORE_BATTERY_OPTIMIZATIONS.	Permission an application must hold in order to use Settings.ACTION_REQUEST_IGNORE_BATTERY_OPTIMIZATIONS.
android.permission.READ_PHONE_STATE	dangerous	read phone state and identity	Allows the application to access the phone features of the device. An application with this permission can determine the phone number and serial number of this phone, whether a call is active, the number that call is connected to and so on.
android.permission.WRITE_SETTINGS	dangerous	modify global system settings	Allows an application to modify the system's settings data. Malicious applications can corrupt your system's configuration.
android.permission.SYSTEM_ALERT_WINDOW	dangerous	display system-level alerts	Allows an application to show system-alert windows. Malicious applications can take over the entire screen of the phone.
android.permission.PACKAGE_USAGE_STATS	signature	update component usage statistics	Allows the modification of collected component usage statistics. Not for use by common applications.
com.google.android.gms.permission.AD_ID	normal	application shows advertisements	This app uses a Google advertising ID and can possibly serve advertisements.

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.POST_NOTIFICATIONS	dangerous	allows an app to post notifications.	Allows an app to post notifications
com.miui.home.launcher.permission.UNINSTALL_SHORTCUT	unknown	Unknown permission	Unknown permission from android reference
android.permission.USE_FINGERPRINT	normal	allow use of fingerprint	This constant was deprecated in API level 28. Applications should request USE_BIOMETRIC instead.
android.permission.sec.MDM_APP_MGMT	unknown	Unknown permission	Unknown permission from android reference
android.permission.sec.MDM_RESTRICTION	unknown	Unknown permission	Unknown permission from android reference
android.permission.sec.MDM_LOCATION	unknown	Unknown permission	Unknown permission from android reference
android.permission.sec.MDM_MULTI_USER_MGMT	unknown	Unknown permission	Unknown permission from android reference
com.sec.enterprise.knox.permission.CUSTOM_SETTING	unknown	Unknown permission	Unknown permission from android reference
android.permission.sec.ENTERPRISE_DEVICE_ADMIN	unknown	Unknown permission	Unknown permission from android reference
com.samsung.android.knox.permission.KNOX_APP_MGMT	unknown	Unknown permission	Unknown permission from android reference
com.samsung.android.knox.permission.KNOX_RESTRICTION_MGMT	unknown	Unknown permission	Unknown permission from android reference
com.samsung.android.knox.permission.KNOX_LOCATION	unknown	Unknown permission	Unknown permission from android reference
com.samsung.android.knox.permission.KNOX_MULTI_USER_MGMT	unknown	Unknown permission	Unknown permission from android reference
com.samsung.android.knox.permission.KNOX_CUSTOM_SETTING	unknown	Unknown permission	Unknown permission from android reference
com.samsung.android.knox.permission.KNOX_ENTERPRISE_DEVICE_ADMIN	unknown	Unknown permission	Unknown permission from android reference
com.kaspersky.supportlibclient.SUPPORT_PERMISSION	unknown	Unknown permission	Unknown permission from android reference
com.google.android.finsky.permission.BIND_GET_INSTALL_REFERRER_SERVICE	normal	permission defined by google	A custom permission defined by Google.
com.kaspersky.safekids.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION	unknown	Unknown permission	Unknown permission from android reference
com.huawei.appmarket.service.commondata.permission.GET_COMMON_DATA	unknown	Unknown permission	Unknown permission from android reference
com.kaspersky.safekids.permission.PROCESS_PUSH_MSG	unknown	Unknown permission	Unknown permission from android reference
com.kaspersky.safekids.permission.PUSH_PROVIDER	unknown	Unknown permission	Unknown permission from android reference

🔍 MANIFEST ANALYSIS

HIGH: **1** | WARNING: **16** | INFO: **0** | SUPPRESSED: **0**

NO	ISSUE	SEVERITY	DESCRIPTION
1	App can be installed on a vulnerable upatched Android version Android 7.0, [minSdk=24]	high	This application can be installed on an older version of android that has multiple unfixed vulnerabilities. These devices won't receive reasonable security updates from Google. Support an Android version => 10, API 29 to receive reasonable security updates.
2	Activity-Alias (com.kaspersky.pctrl.KMSMainLauncher) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
3	Activity (com.kaspersky.pctrl.additional.gui.SchemeActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
4	Activity (com.kaspersky.pctrl.gui.KMSManageSpaceActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
5	Activity (com.kaspersky.pctrl.webfiltering.WebFilterExclusionHandler) is Protected by a permission. Permission: com.kaspersky.safekids.permission.LAUNCH_ACTIVITY protectionLevel: signature [android:exported=true]	info	An Activity is found to be exported, but is protected by permission.
6	Broadcast Receiver (com.kaspersky.pctrl.GcmBroadcastReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: com.google.android.c2dm.permission.SEND [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
7	Broadcast Receiver (com.appsflyer.MultipleInstallBroadcastReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

NO	ISSUE	SEVERITY	DESCRIPTION
8	Service (com.kaspersky.pctrl.rss.KSConnectService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
9	Service (com.kaspersky.pctrl.messaging.firebase.FcmMessageReceiverService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
10	Broadcast Receiver (com.kaspersky.safekids.enterprise.knox.receiver.PreventStartReceiver) is Protected by a permission. Permission: com.kaspersky.supportlibclient.SUPPORT_PERMISSION protectionLevel: signature [android:exported=true]	info	A Broadcast Receiver is found to be exported, but is protected by permission.
11	Broadcast Receiver (com.google.firebase.iid.FirebaseInstanceIdReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: com.google.android.c2dm.permission.SEND [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
12	Service (androidx.work.impl.background.systemjob.SystemJobService) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.BIND_JOB_SERVICE [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
13	Broadcast Receiver (androidx.work.impl.diagnostics.DiagnosticsReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.DUMP [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
14	Broadcast Receiver (androidx.profileinstaller.ProfileInstallReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.DUMP [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
15	Broadcast Receiver (com.huawei.hms.support.api.push.PushMsgReceiver) is Protected by a permission. Permission: com.kaspersky.safekids.permission.PROCESS_PUSH_MSG protectionLevel: signature [android:exported=true]	info	A Broadcast Receiver is found to be exported, but is protected by permission.

NO	ISSUE	SEVERITY	DESCRIPTION
16	Broadcast Receiver (com.huawei.hms.support.api.push.PushReceiver) is Protected by a permission. Permission: com.kaspersky.safekids.permission.PROCESS_PUSH_MSG protectionLevel: signature [android:exported=true]	info	A Broadcast Receiver is found to be exported, but is protected by permission.
17	Service (com.huawei.hms.support.api.push.service.HmsMsgService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
18	Content Provider (com.huawei.hms.support.api.push.PushProvider) is not Protected. [android:exported=true]	warning	A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
19	Broadcast Receiver (com.kaspersky.remote.security_service.base.KsUninstallReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.BROADCAST_PACKAGE_REMOVED [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
20	High Intent Priority (999) [android:priority]	warning	By setting an intent priority higher than another intent, the app effectively overrides other requests.
21	High Intent Priority (999) [android:priority]	warning	By setting an intent priority higher than another intent, the app effectively overrides other requests.

🏴 SHARED LIBRARY BINARY ANALYSIS

NO	SHARED OBJECT	NX	STACK CANARY	RELRO	RPATH	RUNPATH	FORTIFY	SYMBOLS STRIPPED
1	arm64-v8a/libnative_logger.so	True info The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable.	True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.	Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only.	None info The binary does not have run-time search path or RPATH set.	None info The binary does not have RUNPATH set.	True info The binary has the following fortified functions: ['__memcpy_chk', '__memmove_chk', '__vsnprintf_chk', '__strlen_chk']	False warning Symbols are available.
2	arm64-v8a/libapp_services.so	True info The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable.	True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.	Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only.	None info The binary does not have run-time search path or RPATH set.	None info The binary does not have RUNPATH set.	True info The binary has the following fortified functions: ['__memcpy_chk', '__read_chk', '__memset_chk', '__memmove_chk', '__strlen_chk', '__write_chk', '__vsnprintf_chk', '__vsprintf_chk', '__strcpy_chk', '__strchr_chk', '__strrchr_chk', '__FD_SET_chk', '__FD_ISSET_chk', '__strcat_chk', '__umask_chk']	False warning Symbols are available.
3	arm64-v8a/libnative_logger.so	True info The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable.	True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.	Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only.	None info The binary does not have run-time search path or RPATH set.	None info The binary does not have RUNPATH set.	True info The binary has the following fortified functions: ['__memcpy_chk', '__memmove_chk', '__vsnprintf_chk', '__strlen_chk']	False warning Symbols are available.

Title: Kaspersky SafeKids with GPS

Score: 3.3227513 **Installs:** 1,000,000+ **Price:** 0 **Android Version Support: Category:** Parenting **Play Store URL:** com.kaspersky.safekids

Developer Details: Kaspersky ME, 7903718077194687953, Arenco Tower Dubai Internet City Office 2201, 22nd floor - Dubai - United Arab Emirates, https://www.kaspersky.com/safe-kids, mobilesupport@kaspersky.com,

Release Date: Feb 24, 2016 **Privacy Policy:** [Privacy link](#)

Description:

PARENTAL CONTROLS & GPS CHILD-LOCATOR Kaspersky Safe Kids gives you more than standard parental controls to make parenting easier. Besides allowing you to block nasty content at websites and in YouTube, manage device and app use, and find out instantly about suspicious online behavior, it also lets you locate your kids on a map and set a safe area for them to stay in – you can even monitor the battery level on their devices so you don't lose touch. Our Free version lets you: - Block harmful sites and content to ensure safe search - Block bad YouTube search requests * - Manage app use - Set screen time limits - Get advice from child psychologists Our Premium version gives you everything in Free, plus it lets you: - Check your kids' YouTube search history* - Monitor what your children watched on YouTube in browser* NEW! - Locate your children on a map - Define a safe area for them to stay in - Find out when their devices are low on battery - Manage their device use versus their schedule - Get real-time notifications on what they're up to - View detailed reports on their online habits Kaspersky Safe Kids is rated "Excellent" in an independent review by PC Mag, and certified as Approved Parental Control by AV-Test. This superior parental guidance app is also available for Mac, Windows and more. Download it now & start protecting your kids online and beyond. *** Getting started with Kaspersky Safe Kids is easy: 1. Install this app on your mobile in parent mode to see reports & customize settings. 2. Install this app on your kid's device in child mode to apply protection rules. 3. During installation sign in to My Kaspersky – here you can adjust settings and view detailed reports. Please use one single My Kaspersky account for all Kaspersky Safe Kids installations. * Safe Search on YouTube is compatible with browsers on Windows, iOS and Android devices. Plus it works inside the official YouTube app for Android. YouTube watch history is collected for child's activity via Chrome browser on Android, and via supported browsers on Windows PC, with reports are available in Kaspersky Safe Kids app installed in parent mode on Android devices. ** We recommend that you turn on your Global Positioning System (GPS) to increase the accuracy of your child's location. Please note, the GPS usage increases battery power consumption. The app uses the Device Administrator permission. The app uses Accessibility services. Accessibility services is used to block children's access to websites prohibited by parents.
